MR. DONN KELVER, PRESIDENT  
Thermo Cyclor  
1734 West 400 South  
LaPorte, IN 46350

Dear Mr. Kolver:

Last year we purchased two of the Thermo Cyclor units to heat our new 43,000 square foot manufacturing facility with a 35' eave height.

We were astonished at the incredible savings. We had previously had a 20,000 square foot building with conventional gas heat. In December of 1995, our heat bill was \$986. This year with twice the square footage and higher eave height the bill was \$383 with very similar temperatures.

We are extremely impressed with it and so is every person who has seen it. We will probably purchase another one in the future to accommodate our 12,000 square foot building. Please advise what our cost on this unit would be.

We would be more than happy to recommend the Thermo Cyclor to your prospective customers.

Sincerely,

Bill Daugherty, President
